Current Market Trends

Skillfyme Training Benefits

	Skillfyme	VS	Others
Curriculum	Advanced MLOps Pipeline		Normal Machine Learning Technologies or DevOps Pipeline
Faculty	Industry Expert with more than 20+ years of experience in IT industry.		Normal Trained Faculty
Projects	Enterprise /Industry level Live Projects.		Educational Based Project
Case Study	100+ Case Study		10+ Case Study
Doubt Session	24*7 Doubt Session,WhatsApp Mentor Support		Only through Ticket
Teaching Techniques	Case Study, Problem statement and Practical Based Teaching		Conventional PPT based Teaching

Guided to Precision, Aimed for Excellence!

Just like a skilled coach sharpens an archer's precision, our platform ensures you with the best training to achieve your career goals.

How Do We Create Batches ?

- ✓ **Diverse Skill Levels:** Our batches include participants from beginners to advanced levels, ensuring a rich learning environment.
- ✓ **Experience-Based Grouping:** We strategically group students based on their prior experience to maximize peer learning and engagement.
- ✓ **Customized Curriculum:** The training content is tailored to meet the varying needs and proficiency levels of all students.
- ✓ **Interactive Learning:** We provides a collaborative learning atmosphere where experienced students can mentor beginners, enhancing overall understanding.
- ✓ **Comprehensive Support:** Personalised support is available for all skill levels to ensure every student can successfully grasp DevOps concepts.

Skillfyme Highlights

Reach New Peaks in Your Career! Our MLOps program gives you the roadmap to ascend the career ladder with confidence and expertise.

Program Highlights

Highlights That Point You to Success! From hands-on projects to cutting-edge tools, explore the highlights that make our MLOps course your ultimate career guide.

Tools Covered

An Ocean of Possibilities in MLOps

Each dot on the map marks a tool that transforms the way you build, deploy, and scale. From Kubernetes to Jenkins, Terraform to TensorFlow, explore the vast ecosystem of tools covered in our course and navigate your path to ML Ops mastery.

Course Content

01

Introduction to Python Programming

- Working with Data in Python (Lists, Dictionaries, and Tuples)
- Introduction to NumPy for Numerical Computing
- Working with Pandas for Data Manipulation
- Introduction to Scikit-Learn for Machine Learning

02

MLOps Foundations

- Overview of MLOps workflows: Versioning data/models, CI/CD for ML.
- Tools overview: MLflow, Kubeflow, TensorFlow Extended (TFX).
- Hands-On: Set up version control for datasets using DVC; explore basic CI/CD pipelines for ML.

03

Automating ML Pipelines

- Data preprocessing pipelines: Apache Airflow integration.
- Model training: Distributed training with Kubernetes.
- Hyperparameter optimisation: Using Optuna or similar tools.
- Hands-On: Create an Apache Airflow DAG, deploy distributed training on Kubernetes, and automate hyperparameter tuning.

Course Content

04

Model Deployment & Serving

- Deploying with Kubernetes: KServe, TensorFlow Serving.
- Real-time inferencing vs batch inferencing: Use cases and architecture.
- Hands-On: Deploy a real-time inference model with KServe and set up batch inferencing with Airflow.

05

Monitoring & Feedback Loops

- Model drift detection and retraining strategies.
- Custom monitoring with Prometheus/Grafana for ML systems.
- Hands-On: Detect data drift with Evidently AI and create custom monitoring dashboards using Prometheus and Grafana.

06

Cloud Implementation

- Implementing MLOps pipelines on AWS, Azure.
- Using managed services like SageMaker or Azure ML.
- Hands-On: Deploy end-to-end pipelines using AWS SageMaker and Azure ML.

Course Content

01

Introduction to Python Programming

- Working with Data in Python (Lists, Dictionaries, and Tuples)
- Introduction to NumPy for Numerical Computing
- Working with Pandas for Data Manipulation
- Introduction to Scikit-Learn for Machine Learning

02

MLOps Foundations

- Overview of MLOps workflows: Versioning data/models, CI/CD for ML.
- Tools overview: MLflow, Kubeflow, TensorFlow Extended (TFX).
- Hands-On: Set up version control for datasets using DVC; explore basic CI/CD pipelines for ML.

03

Automating ML Pipelines

- Data preprocessing pipelines: Apache Airflow integration.
- Model training: Distributed training with Kubernetes.
- Hyperparameter optimisation: Using Optuna or similar tools.
- Hands-On: Create an Apache Airflow DAG, deploy distributed training on Kubernetes, and automate hyperparameter tuning.

Projects

From liftoff to landing, master the tools that power the DevOps & ML Ops universe. Explore Kubernetes, Terraform, Jenkins, TensorFlow, KServe, and beyond in our comprehensive Projects.

MULTI-CLOUD PIPELINE DEPLOYMENT

Develop and deploy a comprehensive MLOps pipeline that integrates both AWS and Azure cloud platforms. This project aims to build an end-to-end machine learning workflow, from data preprocessing to model training and deployment, leveraging AWS SageMaker and Azure ML for cloud-based services. KServe will be used for model deployment, ensuring scalability and performance across multi-cloud environments.

DRIFT DETECTION & FEEDBACK LOOPS

Implement a system to detect model drift using Evidently AI and automate feedback-driven retraining processes. This project focuses on identifying when model performance degrades due to changes in data distribution (data drift) or relationships between inputs and outputs (concept drift). By using tools like Airflow for automation and TensorFlow for retraining, the project ensures continuous model improvement through real-time feedback loops.

MODEL DEPLOYMENT WITH KSERVE

Deploy a trained machine learning model in a Kubernetes environment using KServe to serve predictions at scale. This project involves setting up KServe for model serving, configuring autoscaling, and monitoring the deployment with tools like Prometheus and Grafana to ensure performance and reliability. It provides hands-on experience with production-grade deployment and monitoring of ML models.

END TO END PIPELINE WITH KUBEFLOW

Build an end-to-end machine learning pipeline using Kubeflow to automate the stages of data preprocessing, model training, and evaluation. Leverage TensorFlow or Keras for model development and integrate AWS S3 for data storage and management. This project will provide experience in orchestrating ML workflows in a scalable and efficient manner using Kubeflow's components.

Success Starts Here!

Offers Our Alumni Climbed For!

Our graduates are reaching the pinnacle of success, securing positions at top organizations around the globe. From innovative tech giants to trailblazing startups, our alumni have conquered career peaks, proving the transformative impact of our programs. Join us, and let us guide you to the summit of your professional journey!

What Our Alumni speaks?

Google Riju Roy
Reviews ★★★★★

Skillfyme's DevOps training significantly upgraded my skills, boosting confidence in implementing automation tools, cloud services and continuous integration.

Recommendation: Highly recommend Skillfyme's DevOps training for professionals seeking to elevate their expertise.

Google Md. Younis Khan
Reviews ★★★★★

I enrolled in the recent batch of Sep 24 after giving it a long thought as i was quite skeptical at first since I had enrolled previously in DevOps courses from other content providers and had a really bad experience. But at Skillfyme it has been a different experience believe me the content is vast and detailed. Instructor (Sonal) is the best and support is awesome.

Google Aman Deep
Reviews ★★★★★

I completed the DevOps AI course. The trainer was really good, and the LMS was easy to use. I learned a lot, and the curriculum has helped me in my current project. The course was fun and interactive. All the classes were live, making it a good hands-on course. It's the best way to learn this stuff. Thank you!

Google Akshat Trivedi
Reviews ★★★★★

The course is supportive, trainers are ready to help and are knowledgeable. Value for money.

I learned devOps from this course. I highly recommend it.

Google Manisha Mishra
Reviews ★★★★★

Class Quality is good
Placement is decent but slow, they committed for 1 year so still going on.

Support team helps when needed.
Faculty are best in this program.

Google Rakshit Kumar
Reviews ★★★★★

The faculty, the program manager and the mentors are super nice and supportive. Any questions are well and quickly responded. I am really appreciated and glad to join the program at Skillfyme.

About Us!

At Skillfyme, we prioritise building robust technical skills, enhancing problem-solving abilities, and fostering critical thinking through hands-on learning experiences. Our instructor-led courses are tailored to equip you with the practical knowledge and skills needed to thrive in today's competitive job market.

Transform your career with Skillfyme!
